

Using the Terminal Application

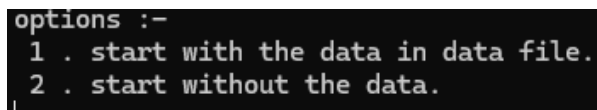

July 18, 2024

Abstract

This guide provides instructions on how to use our application. It covers basic commands, file navigation, and other essential tasks.

1 Load Previous Data or Start New Data

To load the data, you can press 1. To start with new data, press 2.

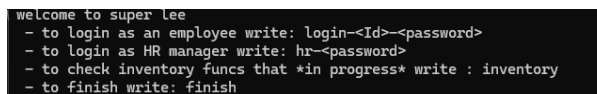

A terminal window with a dark background and light green text. It displays a menu titled 'options :-' with two numbered options: '1 . start with the data in data file.' and '2 . start without the data.'

```
options :-  
1 . start with the data in data file.  
2 . start without the data.
```

Figure 1: Response

On pressing 2, you have to set a password for the HR manager and add a store. On pressing 1, you can start.

2 Getting Started

A terminal window with a dark background and light green text. It displays a welcome message 'welcome to super Lee' followed by a list of instructions: '- to login as an employee write: login-<Id>-<password>', '- to login as HR manager write: hr-<password>', '- to check inventory funcs that *in progress* write : inventory', and '- to finish write: finish'.

```
welcome to super Lee  
- to login as an employee write: login-<Id>-<password>  
- to login as HR manager write: hr-<password>  
- to check inventory funcs that *in progress* write : inventory
